Attachments: Study Evaluation Tables - All Cancers - November 16 2015.docx

Ok so here is my first crack at merging our two tables and fixing any formatting issues. All comments were for data I added in. If a paper did not have average length of study, I did not include a comment stating that. All comments were for data I added in.

Better to keep more detail at this stage -- so yes.

Hey Tom,

Quick question right off the bat for you, do you want me to include the average length of follow-up in instances where median follow-up is already in place?

Hi Nick,

I'm attaching my working copy of the study evaluation table. I have not moved your edits to this copy. Could you please bring my copy up to date with your changes (and track them)?

And then please crosscheck the document for consistency in exposure evaluation and summary classification between the small tables up front and the main evaluation tables.

If you can fix any of the formatting irregularities, please do!

And flag any places where something seems 'off' and I will recheck it.

Thanks!

Tom
